### **C&O Canal Drains Water from Lock 23 to Lock 20 in Great Falls, MD**

Potomac, MD– On Tuesday, January 10, 2017, the Chesapeake and Ohio Canal National Historical Park (C&O Canal) began draining the watered canal section from Lock 20 (Towpath Mile 14) to Lock 23 (Towpath Mile 22). The draining will allow for a topographic survey to be conducted by park staff in order to better quantify the amount of sediment which has accumulated within the canal prism. Sediment is naturally deposited into the canal by local streams and the Potomac River. The data collected from the topographic survey will be used to evaluate the potential to remove the sediment deposits in the future. Future projects would consider removal of the sediment deposits to restore the canal by increasing water depths. The restoration will allow the continued operation of the mule drawn 1870's era canal boat *Charles F. Mercer* as well as improve recreational boating opportunities. Once the topographic survey is completed, the canal will be re-watered. Draining, topographic survey, and re-watering is not expected to last more than a week, weather permitting.

**ABOUT THE C&O Canal:** The Chesapeake and Ohio Canal National Historical Park preserves and interprets the historical, natural and recreational resources of the C&O Canal. Over 5,000,000 visitors a year enjoy the opportunities for recreation and understanding that the Park has to offer. For more information, visit the Park's website at [www.nps.gov/choh](http://www.nps.gov/choh).

EXPERIENCE YOUR AMERICA™

The National Park Service cares for special places saved by the American people so that all may experience our heritage.
